THE ULTIMATE TILE & STONE EXPERIENCE

New Products: Post-Coverings edition

Here's a look at some new product highlights from the show floor at Coverings.

Applied Coatings Group – Color Mirage™ glass blocks feature a dichroic coating inside each block, creating a change in color and intensity

depending on the viewer's perspective. Currently available in a range of patterns, sizes and colors for interiors, glass blocks are being tested against the standard for insulated windows, which will enable blocks to be used in exteriors as well.

Crossville

Building Blox is the new collection of Porcelain Stone® tile created in collaboration with internationally renowned Robert A.M. Stern Design. The line features three patterns for walls and floors: Urban Fabric, Greek Key (both inspired by architectural decorative details) and City Garden, giving a modern geometric flair to traditional floral motif reminiscent of 19th century wall coverings. Each 12x12 and 18x18 patterned tile has a coordinating solid in 12x12, 18x18 and 6x12 formats in nine colors, with bullnose, cove base and inner and outer corners.

GranitiFiandre – American-produced

Nihon Collection reflects Japanese influence in its

textural inspirations of sands, tatami mats and stone, offering

a tranquil mix of tradition, technology, natural influence and spirituality for contemporary and urban settings. Five colors of Nori (black), Ishi (grey), Yuki (white), Tatami (brown-shown) and Goma (beige) evoke elements of the Japanese culture. Formats include 24x24, 12x24, 6x24, 4x24, 2x24, 18x18 and 18x12 with special pieces and trims.

Firenze Tecnoarte is the U.S. arm of

Lamosa, selling into our market through distribution. The factory introduced five new lines for the U.S., including Conchuela Fossil (shown), a glazed, full color body porcelain in 12x12, 18x18 and 24x24 sizes that emulates meteoric rock with fossil-like swirls within the tile. Part of the Maya Collection, it's complete with bullnose and mosaics. Neal Gray, the vice president of sales, noted that 5-10 more lines will be developed for the U.S. market over the next year.

LATICRETE's LATAPOXY[®] 312 Vapor Reduction Membrane is a three-component, roller applied, solvent-free epoxy coating, designed to reduce vapor emission from concrete substrates for a variety of floor coverings over properly prepared substrates. When used in conjunction with LATICRETE self-leveling mortars, membranes and adhesives, it's a component of the LATICRETE 10 Year System Warranty and the LATICRETE 15 Year Residential Warranty. LATICRETE[®] 125 Sound and Crack Adhesive is a flexible, lightweight Kevlar[®]-reinforced sound deadening and anti-fracture mortar that takes the place of liquid or sheet membranes used in traditional thin-set combinations to deaden sound and bridge cracks, providing sound transmission protection while bridging existing cracks in the substrate up to 1/8-inch and pre-

venting new cracks from transmitting through to the finished tile or stone surface. It's backed the LATICRETE 25 Year System Warranty.
