Oceanside Glasstile® Showcases  
New Elevations™ Collection at  
NeoCon® World's Trade Fair

*New Large Format Glass Field Tile Collection  
Makes Strong Architectural Statement;  
Gem-like Facets™ Miniature Mosaic Field will also be shown*

**CHICAGO – June 12, 2006** – Oceanside Glasstile, a world leader in the design and production of handcrafted glass tile, today announced it will be featuring *Elevations™*, a new line of modular larger format field tile and multidimensional decorative liners, and its *Facets™* collection of miniature mosaic field tile in its Booth #7-8110 at NeoCon World's Trade Fair in the Architectural Tile and Stone Pavilion, June 12-14 in Chicago at the Merchandise Mart.

Available in showrooms later this summer, the *Elevations* series of large field tile and decorative liners features clean lines and modern aesthetics. Its combination of sizes and multidimensional geometric decorative liners makes a strong statement in a broad range of architectural styles, both commercial and residential.

Sold as individual pieces, field sizes range from 1 ¼" x 10" to 10" x 10", and 2 ½" x 2 1/2" to 5" x 10". An additional field tile, *Extrados* (1 ¼" x 10") has a bold three-dimensional arch, which adds to its design interest especially when set in an offset pattern. The *Elevations* collection creates dramatic indoor and outdoor floor and wall applications; set vertically, horizontally, straight set, offset, or in random modular patterns. Six distinctive decorative liners in geometric relief patterns, rare in the field of glass tile, are available—*Vanishing Point*, *Optics*, *Levels*, *Decipher*, *Freehand* and *Mirage*—averaging 2 ¼" x 10 3/4" in size.

*Elevations* decorative liners and most field tile sizes are available in 34 iridescent and non-iridescent colors. 5" x 10" and 10" x 10" field are available in seven iridescent colors. The lines 3/8"-plus thickness makes for ease of mixed media installation with materials such as ceramic, porcelain and stone.

### Facets

Also on display in Oceanside Glasstile's booth will be the new *Facets* field tile, which mirrors in miniature the company's popular *Tessera*™ line of mosaic glass tile. Named for its gem-like qualities, *Facets* sparkles with reflective light creating a rich, luminous and expressive look. *Facets* field, one of the smallest glass tile mosaics in the industry, is offered in three sizes: 1/2" x 1/2"; 1/2" x 1" Offset Joint; and Random Modular. Available in showrooms later this summer, *Facets* field tile comes face-mounted on paper in 12" x 12" sheets (all sizes are nominal).

Gem-like and lustrous *Facets* border and field tile patterns are made-to-order in a choice of 44 iridescent and non-iridescent colors in Ocean or Earth palettes. Because colors are custom specified, *Facets* borders and field tile patterns offer a wide range of highly individual design options. Borders coordinate beautifully with *Facets* mosaic field. Border sizes vary, with the average border running 3" tall by 12" wide and many can be cut into small decorative or narrow linear accents. Extremely versatile, *Facets* can be used in a wide range of design applications.

### Timeless Tessera Mosaics

Design classic *Tessera* mosaics will also be on display in the company's booth. New designer colors in *Olive* and *Tahoe* add to the line's Ocean and Earth palettes of more than three dozen shimmering iridescent and non-iridescent colors plus over two dozen blends including the new *Disco Inferno*, *Tapenade*, *Cammie*, *Vogue*, *Shire*, and *Enchantment*. *Tessera* also offers the ability to create custom blends using any combination of colors.

### About Oceanside Glasstile

Oceanside Glasstile is a world leader in the design and production of hand crafted glass tile, providing unique and innovative products to the tile, architectural and design industries as well as consumer markets. Oceanside Glasstile pioneered the development of glass tile products, which it markets globally to distributors and showrooms. Oceanside Glasstile products are consciously crafted and beautifully "green," made from silica sand, an abundant natural resource, and up to 86% recycled material. For more information about Oceanside Glasstile, please visit [www.glasstile.com](http://www.glasstile.com).
