**CASA CALIFORNIA® FROM OCEANSIDE GLASSTILE
TAKES GRACIOUS LIVING TO A NEW DIMENSION**

***New Dimensional Field Pieces Work Beautifully
As Connecting Patterns or Decorative Accents***

Carlsbad, Calif. – June 3, 2008 – Oceanside Glasstile has announced the addition of 12 new dimensional designs to its popular Casa California line of field tile, liners, and decos.

The new contoured pieces integrate organic and geometric motifs complimenting the gracious, relaxed feel of Casa California's Mediterranean-inspired colors and existing patterns. Designs interlock, creating striking feature walls or textured accents.

"Inspiration is everywhere," said New Product Design Director, Feras Irikat. "A flirtatious Blink of an eye, the rolling motion of a wave (Onda in Spanish), the pleated look of the Japanese Obi, or the intricate folded designs of Origami. Our new Casa California pieces beautifully interpret these design inspirations in the medium of handcrafted glass tile."

New Casa California dimensional field includes Blink (7 3/8" x 4"), Syncopation (4" x 4"), Lune (4" x 4") and Keystone (5" x 4"). All sizes are nominal. Liners include Origami (2 1/4" x 7 7/8"), Onda (2 1/2" x 7 7/8"), Vapor (2 1/2" x 7 7/8"), and Twin Peaks (2" x 7 7/8"). Decos, all 1 7/8 x 1 7/8" (nominal), are Eddy, Obi, Syncopation, and Origami.

A green building material, Oceanside Glasstile is made from silica sand, an abundant natural resource, with many colors also containing post-consumer recycled bottle glass and/or glass recycled from the company's manufacturing process. Each year the company uses over 2 million pounds of glass from curbside recycling programs, turning waste that would otherwise end up in landfills into beautiful and sustainable design materials.
