Oceanside Glasstile Introduces Oceancare *The Complete Tile Maintenance Solution*

Carlsbad, Calif – Immediate Release - Oceanside Glasstile launches its newest product to the market: Oceancare. Oceancare products answer the most common questions asked about tile and natural stone maintenance, and when used as a system provide a complete maintenance solution. Oceancare is simple to use, safe, highly effective and meets the highest standards of eco-friendly criteria. Best of all, Oceancare is safe for most types of tile, including porcelain, ceramic, natural stone, glass, and iridescent glass tile. There are no adverse effects that can result from using bleach, acid, ammonia, and abrasive cleaners.

Oceanside Glasstile has been a tile industry leader for 20 years. Tile maintenance is an important aspect of keeping a tile installation looking fresh, clean, and beautiful. Over the years our Technical Services team has fielded questions on how to best take care of their Oceanside Glasstile installations. Through three years of extensive development and a passionate understanding of both trade and consumer needs, we produced a comprehensive program of cleaners and sealers that have been designed to work with the needs of glass tile. The goal was to create something that was easy to use, safe for glass tile, environmentally friendly but still highly effective, the result, Oceancare.

Oceancare is a suite of products, when used in conjunction with one another create a complete maintenance solution. The suite is color-coded and clearly named to help identify each product, and comes with an easy to use application chart. Heading the suite is the High Performance Penetrating Sealer. This solvent-based sealer penetrates and protects grout, natural stone, quarry tile, terracotta, and other porous masonry materials. Beyond it's use, it is a low residue, low VOC formula, that can be applied to dry, damp, cured or uncured grout, and is SCAQMD compliant. The suite also includes a Ph Neutral Tile & Stone cleaner, Glass Tile Shower cleaner, and All Natural Degreaser that is "Safe enough for the kitchen, tough enough for the garage". Rounding out the suite is the Calcium Releaser. The Calcium Releaser is a non-acidic, innovative technology that targets heavy calcium deposits and efflorescence, is environmentally safe, and does not affect the pool Ph.

Oceanside Glasstile's philosophy has and continues to be focused on sustainable processes and dedication to environmental stewardship. Oceancare is one of many initiatives to continually enhance our sustainable efforts. Oceanside Glasstile is a sustainable organization with measurable goals that target improvements in energy reduction, elimination of waste, and green business practices.
