OCEANSIDE GLASSTILE ADDS CHARACTER TO AN OLD PLAYER

This Summer get Hooked on Hexagons

Carlsbad, Calif. – July – Hexagons take on new dimension this summer! Recognizing the call for the traditional hexagon, Oceanside Glasstile steps up the game by introducing new character to an old player with the Trillion and Framework designs. Rounding out this trio of distinctive Hex's is a complimentary Flat 4" Hexagon. Further recognizing the passion to create a distinctive, flowing texture, a new mosaic Braid pattern gets added to the Muse collection begging to be customized to it's full potential!

Casa California's dimensional field family grows larger this Summer with the introduction of Trillion! Composed of three oscillating diamonds, Trillion is an optical illusion reminiscent of an M.C. Escher print. Johnny Marckx, Executive Vice President, points out, "Four inches is an optimal size, making it a user-friendly piece for both residential backsplashes and full-scale commercial feature walls." Not to be underestimated as just another hexagon, it is Trillion's uniqueness that will turn any surface into a statement piece. Oceanside Glasstile's translucent color palette has never looked better! Trillion's varied thickness provides added depth to each color, creating a two-in-one effect, all while the iridescence catches the light and draws your eye to every corner and angle.

Continuing Hexagon's revival, the Summer Release also includes a 4" Framework Hexagon and it's flat field counterpart. Evocative of a honeycomb, Oceanside Glasstile's 4" Framework Hexagon is as sweet as can be with its lovely bi-level arrangement. Cathy Aroz, Design Extraordinaire states, "By creating these 2 different depths the perfect playground for color is formed showcasing deep hues kissing their softer side." Inspired to create a field of harmony the 4" Framework Hexagon and 4" Flat Hexagon create the ultimate element of surprise for your next installation.

The Muse Collection also welcomes a new mosaic pattern the Braid! Inspired by the motion of Muse's Wave pattern, the Braid takes on added movement with its interweaving micro mosaics. The 5/8" x 5/8" mosaic Braid pattern offers endless custom capabilities. Available in the entire Muse color palette, you can use up to three unique colors and three dynamic finishes to create an interwoven masterpiece. Imagine. Play, and enjoy your journey to the perfect residential or commercial glass tile installation.

“Cheers!” It’s the first word Oceanside Glasstile products hear before beginning their journey to up-cycled glory! Each year they melt more than 2 million pounds of post-consumer bottle glass. The result – a gem-like substance crafted into stunning glass tile. They continuously strive for improvements in energy efficiency, and maintain a closed loop manufacturing process where they re-melt all of their own glass trimmings. Manufacturing innovative products with a sustainable process is an important business value, but . . . that’s just where the fun begins. Encouraged by the leadership of the company, Oceanside Glasstile employees support all kinds of causes both near and far. Embracing social responsibility, they find joy in restoring orphanages, building schools, planting new trees and collaborating with the generation of tomorrow. Both home and commercial designs will get a dose of good vibes when they incorporate this environmentally-aware, socially-responsible product into their work-in-progress.
